

The COE Faculty Mentoring Program is designed to “provide a network of mentors, resources and opportunities to help COE’s faculty integrate into the department and campus culture and further, to provide a sense of community, support and accountability.”

The College maintains a shared google drive with resources to support faculty development. These include resources to support:

- Development of successful mentor/mentee relationships
- Publication
- The retention, promotion and tenure process (including example files from faculty)

Please contact the coordinator of the program for more information and access to the shared drive. [Jessica Suhrheinrich](#)
